E&S RISK IDENTIFICATION

_Analysis aimed at verifying whether the counterparties or underlying activities are on the **E&S exclusion list** or the **E&S identification list** or whether the client's transaction is in a sector covered by a sector policy

_This process makes it possible to review compliance with the criteria of the various sectorspecific policies

E&S ASSESSMENT

_Focuses on **E&S reputational risk** and the risk of non-alignment with E&S policy criteria

_Analysis includes compliance with the criteria of the applicable E&S policy(ies), the severity of E&S controversies and the CSR maturity of the counterparties

E&S ACTIONS

_The E&S assessment can result in a positive, conditional (contractual conditions, action plans, restrictions) or **negative** E&S opinion.

_Mitigation actions are proposed in proportion to the residual risk identified.

_Opinions that are not positive and proposed action plans are reviewed by the second line of defence and may be mediated by the heads of the business lines if necessary.

_Monitoring and controls are also gradually being implemented in E&S risk management processes within the business lines.

NORMATIVE

(SG CODE)

MANAGING LONG TERM IMPACT OF CLIMATE RISK

GOVERNANCE:

- Since 2017, Group Risk Committee reviews climate risks at least once a year
- Systematic communication to the Board of the content of discussions and decisions taken

ANTICIPATION:

Voluntary participation in ACPR and EBA climate stress test exercises, which foster R&D on dedicated quantification methodologies (especially ACPR)

TRANSPARENCY:

Second Climate Disclosure report published in 2020

MEASURING SENSITIVITY TO CLIMATE RISK:

- _ Implementation of a Climate Vulnerability Indicator (CVI), to reinforce the credit analysis on the most exposed counterparties. The CVI:
 - _ corresponds to the marginal impact on the counterparty internal rating over a 20-year time horizon of a selected transition scenario (currently the IEA SDS), with a strong assumption that the counterparty takes no adaptation measures;
 - _ evaluated alongside the internal rating and is applicable to all sectors identified as sensitive to transition risk (oil and gas, power, transport, metals and mining, commercial real estate);
 - _ represented through a 7-level scale: for counterparties that score poorly, a discussion has to be initiated to formalise an opinion on the adaptation strategy of the counterparty to transition risk

ONGOING R&D PROJECTS USING SCENARIO ANALYSIS:

- _ Identification of transition and physical risks impact on sovereigns: a proof of concept for a sovereign Climate Vulnerability Indicator has been conducted
- _ Identification of physical risk impact on credit risk: retail mortgage loan portfolio and large corporate borrowers

CYBER SECURITY AND ARTIFICIAL INTELLIGENCE

GOVERNANCE OF CYBER SECURITY

FONE FROM THE TOP

- **Cyber security is monitored by the Board of Directors' Risk Committee, which receives** a quarterly IT and cyber dashboard
- The Group Risk Committee monitors quarterly the progress of the cyber security strategy
- Additional quarterly reporting to the ECB and local regulators
- **Group CSO** (Chief Security Officer), in charge of the Group Security Department
- **Group CISO** sets the Information Systems Security (ISS) strategy, ensuring policies are observed across the Bank. The CISO sits on the CIO Management Committee and is the Chairman of the weekly Group ISS Executive Committee
- Computer Emergency Response Team "CERT" (the first of its kind to be registered by a French company in 2009) centralises and coordinates response to security incidents
- **REDTEAM SG** tests Group defense and response to targeted attacks, based on Threat Intelligence which goes far beyond classic penetration testing. The approach is aligned with the TIBER-EU Framework established by the ECB. At the end of each mission an action plan is established and followed in project mode.
- Development of two IT hubs in Africa in 2016, and dedicated local CISOs in Europe, Africa and Russia who sit in the Group ISS Executive Committee
- Security policies aligned with international standards and compliant with regulation
- **Mandatory training for all staff and external providers,** in addition to special awareness actions, and specific training for cyber specialists (eg ISO 27005 certification, GIAC Advanced Smartphone Forensics, CISSP, CISM)

CONTEXT and COLLABORATION

The EU regulatory framework for cyber and data security is moving fast:

- the EU General Data Protection Regulation ("GDPR") was introduced in May 2018 and improves data governance and protection.
- the Network and Information Security ("NIS") Directive is currently being implemented across member states: it provides organisational and technical measures to increase the level of cyber security in the EU across essential sectors, including banking and finance. SG is already working on the potential impacts of the implementation of the second version of NIS 2.
- Future challenges are anticipated: the proposal for a **Digital** operational resilience Act (DORA) will shape the new landscape for ICT resilience and third-party provider management. SG is committed to actively contribute to the ongoing discussion through collective initiatives with the industry.

SG is constantly adapting to this challenging context with the ambition to leverage on those regulations to improve its own security.

CYBER SECURITY STRATEGY BASED ON TWO PILLARS: PROTECTION AND EFFICIENCY

WE WORK HAND IN HAND WITH THE BUSINESS because we need them to make the right decisions

Protect client data and our operations

WE APPLY A UNIFIED SECURITY

MODEL to break silos, accelerate our delivery, and reduce costs

talents

Improve operational efficiency

WE MAKE OUR ACTIVITY ATTRACTIVE to retain and attract our cybersecurity

WE OPTIMISE OUR COSTS TO REINFORCE RUN

WF REINFORCE OUR **INFRASTRUCTURE** because attackers exploit widespread vulnerabilities and use known propagation mechanisms

We prepare for a crisis of great magnitude

because this type of scenario is increasingly probable and nobody is safe from cyber threat.

EUR 650M INVESTMENT IN SECURITY 2021-2024

GOVERNANCE OF ARTIFICIAL INTELLIGENCE

- STRONG GROWTH IN THE ADOPTION OF DATA AND AI IN THE TRANSFORMATION OF SOCIETE GENERALE OVER THE LAST TWO YEARS: WE NOW COUNT MORE THAN 500 DATA USE CASES IN OUR PIPELINE, OF WHICH 200 ARE LIVE
- DATA SCIENCE TEAMS NOW TOTAL MORE THAN 150 FULL TIME EMPLOYEES

BOARD OVERSIGHT

- **Key expertise** required from the Directors is a blend of experience in risk, digital and internal control: achieved through the balanced composition of the Board
- Several dedicated **training sessions** on AI held in 2018 and 2019

GOVERNANCE PRINCIPLES

- Governance principles related to model risk management, and presented to the Group Risk Committee, apply to AI
- They encompass the complete model life cycle, from conception to usage to monitoring and are based on independent lines of defence
- Due to the technical aspects and complexity of some AI models, some dedicated due diligence is performed for:
 - bias detection and mitigation,
 - construction and selection of input data,
 - _ transparency and explanatory needs, misconception monitoring
- Complementary principles related to the **ethical use** of AI are currently being designed
- **Actively engaging** with policymakers and other stakeholders

This presentation contains forward-looking statements relating to the targets and strategies of the Societe Generale Group.

These forward-looking statements are based on a series of assumptions, both general and specific, in particular the application of accounting principles and methods in accordance with IFRS (International Financial Reporting Standards) as adopted in the European Union, as well as the application of existing prudential regulations.

These forward-looking statements have also been developed from scenarios based on a number of economic assumptions in the context of a given competitive and regulatory environment. The Group may be unable to:

- anticipate all the risks, uncertainties or other factors likely to affect its business and to appraise their potential consequences;
- evaluate the extent to which the occurrence of a risk or a combination of risks could cause actual results to differ materially from those provided in this document and the related presentation.

Therefore, although Societe Generale believes that these statements are based on reasonable assumptions, these forward-looking statements are subject to numerous risks and uncertainties, including matters not yet known to it or its management or not currently considered material, and there can be no assurance that anticipated events will occur or that the objectives set out will actually be achieved. Important factors that could cause actual results to differ materially from the results anticipated in the forward-looking statements include, among others, overall trends in general economic activity and in Societe Generale's markets in particular, regulatory and prudential changes, and the success of Societe Generale's strategic, operating and financial initiatives.

More detailed information on the potential risks that could affect Societe Generale's financial results can be found in the Registration Document filed with the French Autorité des Marchés Financiers.

Investors are advised to take into account factors of uncertainty and risk likely to impact the operations of the Group when considering the information contained in such forward-looking statements. Other than as required by applicable law, Societe Generale does not undertake any obligation to update or revise any forward-looking information or statements.
