# C. Harmonised Transparency Template - Glossary

The definitions below reflect the national specificities

Field Number	1. Glossary - Standard Harmonised Items	Definition
HG.1.1	OC Calculation: Actual	Contractual & Other "OC" ratio:  The OC ratio as established to comply with contractual and rating agencies minimum requirements is a nominal rate calculated by dividing the nominal outstanding amount of eligible assets (substitute assets and accrued interests excluded) by the nominal amount of covered bonds (after taking into account interest rate and currency swaps and accrued interests excluded).
HG.1.2	OC Calculation: Legal minimum	Regarding the minimum OC rate required by the rating agencies, is disclosed the highest one.  Legal "Coverage ratio":  This ratio is calculated by dividing the total assets amount (including accrued interests, substitute assets, and other assets as prepayments and net accrued incomes on derivatives) by the amount of privileged debts, accrued interests included (covered bonds, sums due on derivatives and collateral management fees).  When the eligible assets are transfered into the cover pool using guaranteed loans, the amount of the guaranteed loans, in the assets amount is replaced by the amount of the eligible assets pledged as collateral.  Following amendments to the French covered bond legal framework for sociétés de credit foncier (SCF), and sociétés de financement de l'habitat (SFH) that came into force on 28 May 2014 (published in JO nº0123 of 28 May 201), a cap on intragroup exposure has been set at 25% of non-privileged resources and the legal minimum collateralisation raised to 105%, from 102%, on a nominal basis.  The legislation requires that the coverage ratio is calculated a posteriori on the basis of the audited accounting figures as of March 31st and September 30th. These ratios are audited and available within a period of three months following the calculation date.  As a consequence, the current ratio is provisionnal /unaudited when the report is published.
HG.1.3	OC Calculation: Committed	"Committed" OC is equal to Contractual OC in order to reassure Rating Agencies.
HG.1.4	Interest Rate Types	Interest Rate Types in the cover-pool of SG SCF are mainly Fixed interest rates, and also Floating interest rates. Interest Rate Types of the Covered Bonds of SG SCF are mainly Fixed coupon, and also Floating coupon mainly based on EIBEUR3M. Interest Rate Types of the Assets of SG SCF are mainly Floating interest rates.
HG.1.5	Maturity Buckets of Cover assets [i.e. how is the contractual and/or expected maturity defined? What assumptions eg, in terms of prepayments? etc.]	Contractual maturities: Contractual maturities are calculated assuming a zero prepayment scenario on the cover pool assets. Regarding covered bonds and substitute assets, contractual maturity is calculated according to the legal final maturity.  Expected maturities: Expected WAL and maturities of the cover pool assets are calculated assuming an average percentage of prepayment rate observed over the last year. The substitute assets being actually composed of cash and term deposits to financial institutions, their expected maturity is assumed to be equal to their contractual one.
HG.1.6	Maturity Buckets of Covered Bonds [i.e. how is the contractual and/or expected maturity defined? What maturity structure (hard bullet, soft bullet, conditional pass through)? Under what conditions/circumstances? Etc.]	"Contractual maturities" and "Expected maturities" : see above.  Maturity structure is Hard Bullet for initial Covered Bonds.  Maturity structure has been Soft Bullet for Covered Bonds emission since 2015.
HG.1.7	LTVs: Definition	N/A for Public Sector Assets
HG.1.8	LTVs: Calculation of property/shipping value LTVs: Applied property/shipping valuation techniques, including whether use of index, Automated Valuation	N/A for Public Sector Assets
HG.1.9	Model (AVM) or on-site audits	N/A for Public Sector Assets
HG.1.10 HG.1.11	LTVs: Frequency and time of last valuation  Explain how mortgage types are defined whether for residential housing, multi-family housing, commercial real estate, etc. Same for shipping where relecvant	N/A for Public Sector Assets N/A for Public Sector Assets

#### Interest rate risk:

Société Générale SCF has a strict policy of neutralising interest rate risks. With this aim in mind, entering into ad hoc hedging swaps establishes a fixed margin on issuance, and any change in interest rates subsequently has a parallel effect on Société Générale SCF's assets and liabilities.

The structural interest rate risk is measured with the help of "gaps" calculated based on the "Liability-Asset" situations of Societe Generale SCF with production halted, detailed over the next 15 years with monthly gaps over the first six months and then annual gaps over the following years.

#### Currency risk:

Hedging Strategy (please explain how you address interest rate and currency risk)

HG.1.12

For USD issues, Societe Generale SCF has eliminated the exchange rate risk by implementing EUR/USD financial hedging swaps.

		For OSD ISSUES, Societe Generale SCF has eliminated the exchange rate risk by implementing EUR/OSD financial nedging swaps.
		As a result, Société Générale SCF is not exposed to foreign exchange risk through its issues.
HG.1.13	Non-performing loans	There are no non-performing loans in the cover-pool of SG SCF.

	· · · · · · · · · · · · · · · · · · ·	Covered bond issuer ratings:
		The rating agencies' methodologies usually take the senior unsecured rating of a covered bond issuer's
		parent company as a starting point for their assessment of the credit risk of covered bonds.
		However, instead of refering to the parent company rating, some rating agencies may issue a "covered bond
HG.3.1	Other definitions deemed relevant	issuer rating" which is an assessment of the credit quality of a CB issuer's credit quality on an unsecured
		basis. Generally, a "covered bond issuer rating" is the same as the senior unsecured rating of the CB
		issuer's parent company although it may be different in some specific cases.
		If no "CB issuer rating" has been granted to the CB issuer, "NA" is indicated.
		Core Tier 1 ratio (%):
OHG.3.1		Core Tier 1 is the Common Equity Tier 1 ratio - CET1 calculated for Bale 2,5
		Covered bonds and cover pool:
		Guaranteed loans:
OHG.3.2		The eligible assets, fully composed by public sector exposures, are transfered into the cover pool using
		guaranteed loans (i.e. collateral directive framework). The outstanding amount of the eligible assets pledged as
		collateral of the loans are indicated instead of the amount of the guaranteed loans.
		The nominal outstanding amount of the eligible assets is booked in Off-Balance Sheet as guarantee received.
		Substitute assets:
		Are reported the amount of substitute assets (accrued interests excluded) as defined by the French Law
		(Articles L515-17 and R515-7 of Code Monétaire et Financier). For SG SCF the subtitute assets are composed of
OHG.3.3		cash and deposits to its parent company. The outstanding amount is booked in Assets - Balance Sheet as
		amounts due from credit institution. These substitute assets are included in the calculation of the legal coverage
		ratio but not taken into account in the nominal rating agencies overcollateralisation ratio.
		Accounting assets not included in the cover pool:
OHG.3.4		Are not included in the cover pool the guaranteed loans (replaced by the eligible assets pledged as collateral)
		and the prepayments and accrued income on derivatives.
		Covered bonds:
OHG.3.5		Nominal amount of covered bonds (accrued interests excluded) in euro equivalent after taking into account the
		cross currency swaps.
		"Of which eligible to central bank repo-operations":
		The outstanding amount of eligible assets including replacement assets shall be filled in.
		If the eligible assets are transferred into the cover pool using guaranteed loans (i.e. collateral directive
OHG.3.6		framework) or mortgage promissory notes, the outstanding amount of the eligible assets pledged as
		collateral of the notes or loans should be indicated instead of the amount of the guaranteed loans.
		The eligibility criteria to central bank repo-operations include the exceptional measures accepted by the ECB in February 2012
		and presently in use with the Banque de France
