Row

Row

The issuer believes that, at the time of its issuance and based on transparency data made publicly available by the issuer, these covered bonds would satisfy the eligibility criteria for Article 129(7) of the Capital Requirements Regulation (EU) 575/2013. It should be noted, however, that whether or not exposures in the form of covered bonds are eligible to preferential treatment under Regulation (EU) 575/2013 is ultimately a matter to be determined by a relevant investor institution and its relevant supervisory authority and the issuer does not accept any responsibility in this regard.

HTT 2024

Definition

Legal "Coverage ratio" :

This ratio is calculated by dividing the total assets amount (including accrued interests, substitute assets and other assets as prepayments and net accrued incomes on derivatives) by the amount of privileged debts

accrued interests included (covered bonds, sums due on derivatives and collateral management fees).

When the eligible assets are transferred into the cover pool using guaranteed loans, the amount of the guaranteed loans in the assets amount is replaced by the amount of the eligible assets pledged as collateral.

Following amendments to the French covered bond legal framework for sociétés de crédit foncier (SCF) and sociétés de financement de l'habitat (SFH) that came into force on 28 May 2014 (published in JO n°0123 of 28 May 2014),

a cap on intragroup exposure has been set at 25% of non-privileged resources and the legal minimum collateralisation raised to 105%, from 102%, on a nominal basis.

The legislation requires that a legal coverage ratio is calculated a posteriori on the basis of the audited accounting figures twice a year : as of December 31st and June 30th and on unaudited accounting figures as of March 31st and September 30th.

These legal ratios are audited and available within a period of three months following the calculation reference date.

The last audited ratio is provided as an additional information.

As a consequence, the current ratio, calculated on a quarterly basis, is provisionnal / unaudited when the report is published and is based on forecast amounts as of the end of each quarter, calculated in the frame of the approval of the funding programme of the issuer.

"Contractual" OC is the OC in order to reassure Rating Agencies.

Voluntary Overcollateralisation is the difference (if positive) between the actual overcollateralisation provided by an Issuer and the higher of the contractual and statutory overcollateralisation.

Interest Rate Types in the cover-pool of SG SFH are mainly fixed interest rates, and also floating interest rates.

"Floating" includes loans with interest rate reset periods exceeding one year (e.g. loan indexed on CMS 5Y with an interest rate reset every five years).

"Mixed" is used for loans with a combination of fixed, capped or floating periods (e.g. 10 years initial fixed rate switching to floating).

Interest Rate Types of the Covered Bonds of SG SFH are mainly Fixed coupon, and also Floating coupon mainly based on EIBEUR3M.

Interest Rate Types of the Assets of SG SFH are mainly Fixed interest rates, and also Floating interest rates.

Contractual maturities :

Contractual maturities are calculated assuming a zero prepayment scenario on the cover pool assets.

Regarding covered bonds and substitute assets, contractual maturity is calculated according to the legal final maturity.

Regarding soft bullet covered bonds, contractual maturity is calculated according to the initial legal final maturity without any extension.

Expected maturities :

Expected WAL and maturities of the cover pool assets are calculated assuming an average percentage of prepayment rate observed over the last year.

The substitute assets being actually composed of cash and term deposits to financial institutions, their expected maturity is assumed to be equal to their contractual one.

Regarding soft bullet covered bonds, expected maturity is calculated according to the legal final maturity including the extended maturity of 1 year.

"Contractual maturities" and "Expected maturities" : see above.

Maturity structure is Hard Bullet for initial Covered Bonds.

Maturity structure has been Soft Bullet for Covered Bonds emission since 2015.

<https://investors.societegenerale.com/fr/informations-financieres-et-extra-financiere/investisseurs-dette>

Unindexed current LTV :

Unindexed LTV is calculated on the basis of the current outstanding amount of the loans and the initial valuation / price of the residential assets.

Indexed current LTV :

Indexed LTV is calculated on the basis of the current outstanding amount of the loans to the appraised values or prices of the residential assets using an indexation methodology.

The current residential values / prices are calculated based on INSEE Index published on the following website address:

<http://www.bdm.insee.fr>

Current value of residential home loans is calculated automatically but also controlled twice a year both internally and by the Contrôleur Spécifique.

The LTV is calculated on a quarterly frequency.

There is always a gap of one quarter between the last LTV valuation and the date of the quarterly ECBC Report.

The SG SFH cover pool is 100% made of french residential home loans totally guaranteed by Credit Logement.

Each table reported in section 4 display information on this french residential fome loan cover pool.

There is no residential mortgage in the SG SFH cover pool.

There is only residential with guarantee insurance in the SG SFH cover pool.

Geographical distribution / regional breakdown :

The geographical breakdown of assets takes into account the location of the property which is refinanced by the guaranteed loans.

The geographical breakdown of assets shall take into account the location of the pledged property for residential mortgages and the location of the property which is refinanced by the loan in the case of guaranteed loans.

Société Générale SFH has set up an Asset Liabilities Management restructuring to optimize the hedging strategy of the Issuer and based on natural hedging between Cover-pool and Covered Bonds.

There are no non-performing loans in the cover-pool of SG SFH.

Definition

Covered bond issuer ratings :

The rating agencies' methodologies usually take the senior unsecured rating of a covered bond issuer's parent company as a starting point for their assessment of the credit risk of covered bonds.

However, instead of referring to the parent company rating, some rating agencies may issue a "covered bond issuer rating" which is an assessment of the credit quality of a CB issuer's credit quality on an unsecured basis.

Generally, a "covered bond issuer rating" is the same as the senior unsecured rating of the CB issuer's parent company although it may be different in some specific cases.

If no "CB issuer rating" has been granted to the CB issuer, "NA" is indicated.

Core Tier 1 ratio (%) :

Core Tier 1 is the Common Equity Tier 1 ratio - CET1 calculated for Bale 2.5.

Guaranteed loans or mortgage promissory notes :

The eligible assets, fully composed of French Home Loans 100% guaranteed by Credit Logement, are transferred into the cover pool using guaranteed loans (i.e. collateral directive framework).

The outstanding amount of the eligible assets pledged as collateral of the loans are indicated instead of the amount of the guaranteed loans.

The nominal outstanding amount of the eligible assets is booked in Off-Balance Sheet as guarantee received.

Substitute assets :

Are reported the amount of substitute assets as defined by the French Law (Articles L515-17 and R515-7 of Code Monétaire et Financier).

For SG SFH the substitute assets are composed of cash and deposits to its parent company. The outstanding amount is booked in Assets - Balance Sheet as amounts due from credit institution.

These substitute assets are included in the calculation of the legal coverage ratio but not taken into account in the nominal rating agencies overcollateralisation ratio.

Accounting assets not included in the cover pool :

Are not included in the cover pool the guaranteed loans (replaced by the eligible assets pledged as collateral) and the prepayments and accrued income on derivatives.

"Of which assets eligible to CB repo-operations" :

The outstanding amount of eligible assets including replacement assets shall be filled in.

If the eligible assets are transferred into the cover pool using guaranteed loans (i.e. collateral directive framework) or mortgage promissory notes, the outstanding amount of the eligible assets pledged as collateral of the notes or loans should be indicated instead of the amount of the guaranteed loans.

The eligibility criteria to central bank repo-operations include the exceptional measures accepted by the ECB in February 2012 and presently in use with the French NCB.

This addendum is optional
