The issuer believes that, at the time of its issuance and based on transparency data made publicly ovailable by the issuer, these covered bonds would satisfy the eligibility criteria for Article 129(7) of the Capital Requirements Regulation (EU) 575/2013. It should be noted, however, that whether or not exposures in the form of covered bonds are eligible to preferential treatment under Regulation (EU) 575/2013 is ultimately a matter to be determined by a relevant investor institution and its relevant supervisory authority and the issuer does not accept any responsibility in this regard.

C. Harmonised Transparency Template - Glossary

HTT 2025

The definitions below reflect the national specificities

Field Number	1. Glossary - Standard Harmonised Items	Definition
HG.1.1	OC Calculation: Statutory	Legal "Coverage ratio": This ratio is calculated by dividing the total assets amount (including accrued interests, substitute assets, and other assets as prepayments and net accrued incomes on derivatives) by the amount of privileged debts, accrued interests included (covered bonds, sums due on derivatives and collateral management fees). When the eligible assets are transfered into the cover pool using guaranteed loans, the amount of the guaranteed loans, in the assets amount is replaced by the amount of the eligible assets pledged as collateral. Following amendments to the French covered bond legal framework for sociétés de credit foncier (SCF), and sociétés de financement de l'habitat (SFH) that came into force on 28 May 2014 (published in JO nº0123 of 28 May 201), a cap on intragroup exposure has been set at 25% of non-privileged resources and the legal minimum collateralisation raised to 105%, from 102%, on a nominal basis. The legislation requires that the coverage ratio is calculated a posteriori on the basis of the audited accounting figures twice a year: as of December 31st and June 30th and on unaudited accounting figures as of March 31st and September 30th. These ratios are audited and available within a period of three months following the calculation date. As a consequence, the current ratio is provisionnal /unaudited when the report is published.
HG.1.2	OC Calculation: Contractual	"Contractual" OC is the OC in order to reassure Rating Agencies.
HG.1.3	OC Calculation: Voluntary	Voluntary Overcollateralisation is the difference (if positive) between the actual overcollateralisation provided by an Issuer and the higher of the contractual and statutory overcollateralisation.
HG.1.4	Interest Rate Types	Interest Rate Types in the cover-pool of SG SCF are mainly Fixed interest rates, and also Floating interest rates. Interest Rate Types of the Covered Bonds of SG SCF are mainly Fixed coupon, and also Floating coupon mainly based on EIBEUR3M.
HG.1.5	Residual Life Buckets of Cover assets [i.e. how is the contractual and/or expected residual life defined? What assumptions eg, in terms of prepayments? etc.]	Contractual maturities: Contractual maturities are calculated assuming a zero prepayment scenario on the cover pool assets. Regarding covered bonds and substitute assets, contractual maturity is calculated according to the legal final maturity. Expected maturities: Expected WAL and maturities of the cover pool assets are calculated assuming an average percentage of prepayment rate observed over the last year. The substitute assets being actually composed of cash and term deposits to financial institutions, their expected maturity is assumed to be equal to their contractual one.
HG.1.6	Maturity Buckets of Covered Bonds [i.e. how is the contractual and/or expected maturity defined? What maturity structure (hard bullet, soft bullet, conditional pass through)? Under what	Contractual maturities and "Expected maturities": see above. Maturity structure is Hard Bullet for initial Covered Bonds.
110.4.7	conditions/circumstances? Etc.]	Maturity structure has been Soft Bullet for Covered Bonds emission since 2015.
HG.1.7 HG.1.8	Maturity Extention Triggers LTVs: Definition	https://investors.societegenerale.com/fr/informations-financieres-et-extra-financiere/investisseurs-dette N/A for Public Sector Assets
HG.1.8 HG.1.9	LTVs: Definition LTVs: Calculation of property/shipping value	N/A for Public Sector Assets N/A for Public Sector Assets
HG.1.10	LTVs: Applied property/shipping valuation techniques, including whether use of index, Automated Valuation Model (AVM) or on-site audits	N/A for Public Sector Assets
HG.1.11	LTVs: Frequency and time of last valuation	N/A for Public Sector Assets
HG.1.12	Explain how mortgage types are defined whether for residential housing, multi-family housing, commercial real estate, etc. Same for shipping where relecvant	N/A for Public Sector Assets Interest rate risk: Société Générale SCF has a strict policy of neutralising interest rate risks. With this aim in mind, entering into ad hoc hedging swaps establishes a fixed margin on issuance, and any change in interest rates subsequently has a parallel effect on Société Générale SCF's assets and liabilities.
HG.1.13	Hedging Strategy (please explain how you address interest rate and currency risk)	The structural interest rate risk is measured with the help of "gaps" calculated based on the "Liability-Asset" situations of Societe Generale SCF with production halted, detailed over the next 15 years with monthly gaps over the first six months and then annual gaps over the following years.
HG.1.14 HG.1.15	Non-performing loans Valuation Method 2. Glossary - ESG items (optional)	Currency risk: For USD issues, Societe Generale SCF has eliminated the exchange rate risk by implementing EUR/USD financial hedging swaps. As a result, Société Générale SCF is not exposed to foreign exchange risk through its issues. There are no non-performing loans in the cover-pool of SG SCF. NA Definition
HG.2.1	Sustainability - strategy pursued in the cover pool	
HG.2.2 HG.2.3	Subsidised Housing (definitions of affordable, social housing) New Property and Existing Property
