4. Compliance Art 14 CBD Check table	**Row**	**Row**
The issuer believes that, at the time of its issuance and based on transparency data made publicly available by the issuer, these covered bonds would satisfy the eligibility criteria for Article 129(7) of the Capital Requirements Regulation (EU) 575/2013. It should be noted, however, that whether or not exposures in the form of covered bonds are eligible to preferential treatment under Regulation (EU) 575/2013 is ultimately a matter to be determined by a relevant investor institution and its relevant supervisory authority and the issuer does not accept any responsibility in this regard.

C. Harmonised Transparency Template - Glossary

HTT 2026

The definitions below reflect the national specificities

Field Number	1. Glossary - Standard Harmonised Items	Definition
HG.1.1	**OC Calculation: Statutory**	Statutory Overcollateralisation is the overcollateralisation percentage required to be provided by each Issuer and included/disclosed in the national covered bond framework.
HG.1.2	**OC Calculation: Contractual**	Contractual Overcollateralisation is the overcollateralisation percentage each Issuer has contractually agreed to maintain pursuant to the covered bond programme documents.
HG.1.3	**OC Calculation: Voluntary**	Voluntary Overcollateralisation is the difference (if positive) between the actual overcollateralisation provided by an Issuer and the higher of the contractual and statutory overcollateralisation.
HG.1.4	**Interest Rate Types**	Interest Rate Types in the cover-pool of SG SCF are mainly Fixed interest rates, and also Floating interest rates. Interest Rate Types of the Covered Bonds of SG SCF are mainly Fixed coupon, and also Floating coupon mainly based on EIBEUR3M.
	Life of cover assets: how is it calculated? Does it only consider the final date of redemption or does it take into account scheduled redemptions for amortising assets? Is is calculated by reference to the next interest reset dates or by reference to the redemption dates ? If assets have a floating or resettable rate, which assumption do you make regarding the future applicable rate?	**Contractual WAL of cover pool assets are calculated :** - Taking into account scheduled redemptions, by reference to the redemption dates - No assumption is made regarding future applicable rate - Assuming a zero prepayment scenario on the cover pool assets Contractual WAL of substitute assets are calculated taking into account the legal final maturity **Expected WAL of cover pool assets are calculated :** - Taking into account scheduled redemptions, by reference to the redemption dates - No assumption is made regarding future applicable rate - Assuming an average percentage of prepayment rate observed over the last year
HG.1.5		The substitute assets being actually composed of cash and term deposits to financial institutions, their expected maturity is assumed to be equal to their contractual one
HG.1.6	**Maturity Buckets of Covered Bonds [i.e. how is the contractual and/or expected maturity defined? What maturity structure (hard bullet, soft bullet, conditional pass through)? Under what conditions/circumstances? Etc.]**	Contractual maturities and "Expected maturities" : see above. Maturity structure is Hard Bullet for initial Covered Bonds. Maturity structure has been Soft Bullet for Covered Bonds emission since 2015.
HG.1.7	**Maturity Extention Triggers**	https://investors.societegenerale.com/fr/informations-financieres-et-extra-financiere/investisseurs-dette
HG.1.8	**LTVs: Definition**	N/A for Public Sector Assets
HG.1.9	**LTVs: Calculation of property/shipping value**	N/A for Public Sector Assets
HG.1.10	**LTVs: Applied property/shipping valuation techniques, including whether use of index, Automated Valuation Model (AVM) or on-site audits**	N/A for Public Sector Assets
HG.1.11	**LTVs: Frequency and time of last valuation**	N/A for Public Sector Assets
HG.1.12	**Explain how mortgage types are defined whether for residential housing, multi-family housing, commercial real estate, etc. Same for shipping where relecvant**	N/A for Public Sector Assets
	Hedging Strategy (please explain how you address interest rate and currency risk)	**Interest rate risk :** Societe Generale SCF has a strict policy of neutralising interest rate risks. With this aim in mind, entering into ad hoc hedging swaps establishes a fixed margin on issuance, and any change in interest rates subsequently has a parallel effect on Societe Generale SCF's assets and liabilities. The structural interest rate risk is measured with the help of “gaps” calculated based on the “Liability-Asset” situations of Societe Generale SCF with production halted, detailed over the next 15 years with monthly gaps over the first six months and then annual gaps over the following years. **Currency risk :** For USD issues, Societe Generale SCF has eliminated the exchange rate risk by implementing EUR/USD financial hedging swaps. As a result, Societe Generale SCF is not exposed to foreign exchange risk through its issues.
HG.1.13		
HG.1.14	**Non-performing loans**	There are no non-performing loans in the cover-pool of SG SCF.
HG.1.15	**Valuation Method**	NA
	2. Glossary - ESG items (optional)	**Definition**
HG.2.1	**Sustainability - strategy pursued in the cover pool**	
HG.2.2	**Subsidised Housing (definitions of affordable, social housing)**	
HG.2.3	**New Property and Existing Property**	
	3. Reason for No Data	**Value**
HG.3.1	**Not applicable for the jurisdiction**	ND1
HG.3.2	**Not relevant for the issuer and/or CB programme at the present time**	ND2
HG.3.3	**Not available at the present time**	ND3
	4. Glossary - Extra national and/or Issuer Items	**Definition**

HG.4.1	**Other definitions deemed relevant**	**Covered bond issuer ratings :** The rating agencies' methodologies usually take the senior unsecured rating of a covered bond issuer's parent company as a starting point for their assessment of the credit risk of covered bonds. However, instead of refering to the parent company rating, some rating agencies may issue a "covered bond issuer rating" which is an assessment of the credit quality of a CB issuer's credit quality on an unsecured basis. Generally, a "covered bond issuer rating" is the same as the senior unsecured rating of the CB issuer's parent company although it may be different in some specific cases. If no "CB issuer rating" has been granted to the CB issuer, "NA" is indicated.
		Core Tier 1 ratio (%) : Core Tier 1 is the Common Equity Tier 1 ratio - CET1 calculated for Bale 2.5.
OHG.4.1		**Covered bonds :** Nominal amount of covered bonds (accrued interests excluded) in euro equivalent after taking into account the cross currency swaps.
OHG.4.2		**Guaranteed loans :** The eligible assets, fully composed by public sector exposures, are transfered into the cover pool using guaranteed loans (i.e. collateral directive framework). The outstanding amount of the eligible assets pledged as collateral of the loans are indicated instead of the amount of the guaranteed loans. The nominal outstanding amount of the eligible assets is booked in Off-Balance Sheet as guarantee received.
OHG.4.3		**Substitute assets :** Are reported the amount of substitute assets (accrued interests excluded) as defined by the French Law (Articles L515-17 and R515-7 of Code Monétaire et Financier). For SG SCF the subtitute assets are composed of cash and deposits to its parent company. The outstanding amount is booked in Assets - Balance Sheet as amounts due from credit institution. These substitute assets are included in the calculation of the legal coverage ratio but not taken into account in the nominal rating agencies overcollateralisation ratio.
OHG.4.4		**Accounting assets not included in the cover pool :** Are not included in the cover pool the guaranteed loans (replaced by the eligible assets pledged as collateral) and the prepayments and accrued income on derivatives.
OHG.4.5		**"Of which eligible to central bank repo-operations" :** The outstanding amount of eligible assets including replacement assets shall be filled in. If the eligible assets are transferred into the cover pool using guaranteed loans (i.e. collateral directive framework) or mortgage promissory notes, the outstanding amount of the eligible assets pledged as collateral of the notes or loans should be indicated instead of the amount of the guaranteed loans. The eligibility criteria to central bank repo-operations include the exceptional measures accepted by the ECB in February 2012 and presently in use with the Banque de France.
