In 2016 the Risk and CSR teams collaborated to analyse climate-related risk, and from 2017 these risk factors were incorporated in the risk appetite of the Group, with Board approval.

Climate-related credit risks are reviewed at least annually through the Group Management Risk Committee.

The risks related to climate change (physical and transition risks) are not considered as a separate risk category: they constitute a risk factor aggravating credit, operational, insurance and market risks.

In October 2018 the Group Management Risk Committee refined the credit risk appetite to take a 2°C transition scenario into account in the Group’s credit risk profile.

Exposure to physical risk in French residential real estate was also presented.

**Transition risk assessment methodology:**
- A reference climate scenario is selected for the Group’s credit policy and reviewed annually: output helps to assess the economic impact on sectors and individual clients.
- A ‘climate vulnerability’ assessment of transition risks is conducted for all client groups in key sectors.
- This evaluation is mandatory for key sectors impacted by climate: oil and gas, metals and mining, transport and power sectors for the corporate credit portfolio.

Societe Generale seeks to participate in the development of methodologies to continue to improve the incorporation of the risk of climate change and participates in a number of working groups:
- the United Nations Environment Programme Finance Initiative (UNEP-FI), from which Societe Generale’s methodology is largely derived.
- the working group organised by the French banking regulator (ACPR) and the Banque de France on climate change risk assessment in the banking sector.
- the ClimINVEST initiative, to develop understanding of the impact of physical risk on SMEs in France.

<td>In August 2015 France became the first country to introduce mandatory climate change-related reporting. Article 173 makes it compulsory for investors to explain how they take climate risks and ESG criteria in their investment decisions, in line with the voluntary recommendations of the Financial Stability Board’s Taskforce on Climate-related Financial Disclosures (TCFD).</td>
<td>In 2012, it became compulsory for French companies to report on the Environmental and Social impacts of their business and to have this information audited. From 2018, the EU Non-Financial Information Directive will reinforce the article 225, and require companies to focus on their major E&amp;S risks and on the management of the adverse impacts of their worldwide activities.</td>
<td>In March 2017, following the UK Modern Slavery Act, France made it compulsory for companies with over 5,000 employees to implement a vigilance plan whose objective is to map, measure and mitigate human rights and environmental risks, on a worldwide basis.</td>

GOVERNANCE OF CYBER SECURITY

CONTEXT and COLLABORATION

• The EU regulatory framework for cyber and data security is evolving:
  – the **Network and Information Security ("NIS") Directive** was adopted in August 2016 and currently being implemented across member states: it provides legal measures to increase the level of cyber security in the EU, facilitating cross-border exchanges of information and cooperation.
  – the **EU General Data Protection Regulation ("GDPR")** was introduced in May 2018 and improves data governance and protection.

• The French State acts with the finance sector in the event of a global attack having a national impact (Loi de Programmation Militaire). The European Directive NIS is currently being implemented across Europe to offer support at a European level.

• Societe Generale works on collective initiatives with the industry to share cyber experience and strengthen procedures. Societe Generale’s Group CISO chairs the Federation Bancaire Française working group. CERT teams across France and internationally meet on a regular basis.

TONE FROM THE TOP

• Cyber security is monitored by the Board of Directors’ Risk Committee and receives a quarterly IT and cyber dashboard

• The Group Risk Committee monitors quarterly the progress of the cyber security strategy

• Additional quarterly reporting to the ECB and local regulators

• Group CSO (Chief Security Officer), in charge of the Group Security Department created early 2018

• Group CISO sets the Information Systems Security strategy, ensuring policies are observed across the Bank

• Computer Emergency Response Team “CERT” (the first of its kind to be registered by a French company in 2009) centralizes and coordinates response to security incidents

• Security policies aligned with international standards and compliant with regulation

• EUR 650m investment in security over 3 years 2017-20

These forward-looking statements are based on a series of assumptions, both general and specific, in particular the application of accounting principles and methods in accordance with IFRS (International Financial Reporting Standards) as adopted in the European Union, as well as the application of existing prudential regulations.

These forward-looking statements have also been developed from scenarios based on a number of economic assumptions in the context of a given competitive and regulatory environment. The Group may be unable to:

- anticipate all the risks, uncertainties or other factors likely to affect its business and to appraise their potential consequences;
- evaluate the extent to which the occurrence of a risk or a combination of risks could cause actual results to differ materially from those provided in this document and the related presentation.

Important factors that could cause actual results to differ materially from the results anticipated in the forward-looking statements include, among others, overall trends in general economic activity and in Societe Generale’s markets in particular, regulatory and prudential changes, and the success of Societe Generale’s strategic, operating and financial initiatives.

More detailed information on the potential risks that could affect Societe Generale’s financial results can be found in the Registration Document filed with the French Autorité des Marchés Financiers.

Investors are advised to take into account factors of uncertainty and risk likely to impact the operations of the Group when considering the information contained in such forward-looking statements.
