This presentation contains forward-looking statements relating to the targets and strategies of the Société Générale Group.

These forward-looking statements are based on a series of assumptions, both general and specific, in particular the application of accounting principles and methods in accordance with IFRS (International Financial Reporting Standards) as adopted in the European Union, as well as the application of existing prudential regulations.

These forward-looking statements have also been developed from scenarios based on a number of economic assumptions in the context of a given competitive and regulatory environment. The Group may be unable to:
- anticipate all the risks, uncertainties or other factors likely to affect its business and to appraise their potential consequences;
- evaluate the extent to which the occurrence of a risk or a combination of risks could cause actual results to differ materially from those provided in this document and the related presentation.

Therefore, although Société Générale believes that these statements are based on reasonable assumptions, these forward-looking statements are subject to numerous risks and uncertainties, including matters not yet known to it or its management or not currently considered material, and there can be no assurance that anticipated events will occur or that the objectives set out will actually be achieved. Important factors that could cause actual results to differ materially from the results anticipated in the forward-looking statements include, among others, overall trends in general economic activity and in Société Générale’s markets in particular, regulatory and prudential changes, and the success of Société Générale’s strategic, operating and financial initiatives.

More detailed information on the potential risks that could affect Société Générale’s financial results can be found in the Registration Document filed with the French Autorité des Marchés Financiers.

Investors are advised to take into account factors of uncertainty and risk likely to impact the operations of the Group when considering the information contained in such forward-looking statements. Other than as required by applicable law, Société Générale does not undertake any obligation to update or revise any forward-looking information or statements. Unless otherwise specified, the sources for the business rankings and market positions are internal.

The financial information presented for quarter and half year ending 30th June 2016 was reviewed by the Board of Directors on 2nd August 2016 and has been prepared in accordance with IFRS as adopted in the European Union and applicable at this date. Limited review procedures on the condensed interim financial statements for the six month period ending 30 June 2016 have been carried out by the Statutory Auditors.
