Frédéric Oudéa, CEO

Paris, 8 June 2016
This presentation contains forward-looking statements relating to the targets and strategies of the Societe Generale Group.

These forward-looking statements are based on a series of assumptions, both general and specific, in particular the application of accounting principles and methods in accordance with IFRS (International Financial Reporting Standards) as adopted in the European Union, as well as the application of existing prudential regulations.

These forward-looking statements have also been developed from scenarios based on a number of economic assumptions in the context of a given competitive and regulatory environment. The Group may be unable to:

- anticipate all the risks, uncertainties or other factors likely to affect its business and to appraise their potential consequences;
- evaluate the extent to which the occurrence of a risk or a combination of risks could cause actual results to differ materially from those provided in this document and the related presentation.

Therefore, although Societe Generale believes that these statements are based on reasonable assumptions, these forward-looking statements are subject to numerous risks and uncertainties, including matters not yet known to it or its management or not currently considered material, and there can be no assurance that anticipated events will occur or that the objectives set out will actually be achieved. Important factors that could cause actual results to differ materially from the results anticipated in the forward-looking statements include, among others, overall trends in general economic activity and in Societe Generale’s markets in particular, regulatory and prudential changes, and the success of Societe Generale’s strategic, operating and financial initiatives.

More detailed information on the potential risks that could affect Societe Generale’s financial results can be found in the Registration Document filed with the French Autorité des Marchés Financiers.

Investors are advised to take into account factors of uncertainty and risk likely to impact the operations of the Group when considering the information contained in such forward-looking statements. Other than as required by applicable law, Societe Generale does not undertake any obligation to update or revise any forward-looking information or statements. Unless otherwise specified, the sources for the business rankings and market positions are internal.

The financial information presented for the quarter year ending 31 March 2016 was reviewed by the Board of Directors on 3 May 2016 and has been prepared in accordance with IFRS as adopted in the European Union and applicable at this date, and has not been audited.
A WELL-BALANCED BUSINESS MODEL SUITED TO THE NEW INDUSTRY CHALLENGES

- Three premium complementary brands

SOCIETE GENERALE GROUP
KEEPING OUR EDGE ON CHALLENGES

French Retail Banking
- Slow growth environment
  - Highly profitable business

International Retail Banking and Financial Services
- High growth businesses
  - Improving profitability

Global Banking and Investor Solutions
- Improving profitability through cost management

Capacity to adapt to the new competitive and rates environment
- Pioneering changes in client expectations
- Transformed business mix with higher fee revenues
- Improving efficiency through roll out of new operational and relationship model

Business refocusing starting to deliver
- Selected investment / divestments to support transformation
- Operations mainly outside the Euro-zone, in high potential businesses or geographies
- Q1 16 RONE(1) 13.6% in a still improving environment

Agile and Focused
- Well-positioned to capitalise on leadership positions and further develop synergies
- Cost reduction and efficiency plan to compensate for higher cost of doing business
- Resilient Q1 16 RONE thanks to refocused and de-risked business

At the forefront of transformation to consolidate the Group’s position as a European leader
