At the heart of our strategy is a clear vision and a well-defined set of targets for 2016. This year, we aim to achieve a constant currency growth of 5% per annum (CAGR) in Net Banking Income (NBI). This target is achievable by leveraging on high-potential markets and businesses, with a focus on synergy and cross-selling activities. Our setup is synergetic, with more than 25% of revenues coming from cross-selling efforts.

Agility and right execution are critical success factors in demanding environments. As part of our strategy, we anticipate a rise in profitability. This rise is expected to be sustainable thanks to:

- Increasing NBI
- Decreasing Cost-Income (C/I) ratio (-3 points)
- Normalised cost of risk
- Reaching EUR 1.8bn net income in 2016

In summary, our key takeaways are:

- NBI growth target of +5% p.a., leveraging on high-potential markets and businesses
- Synergetic setup, with more than 25% of revenues coming from cross-selling
- Agility and right execution: success factors in demanding environments
- Profitability to rise sustainably thanks to:
  - Increasing NBI
  - Decreasing C/I ratio (-3 points)
  - Normalised cost of risk
  - Reaching EUR 1.8bn net income in 2016

Our approach to achieving these targets is methodical and targeted, ensuring a strong foundation for future growth and profitability.
