DISCLAIMER

This document may contain a number of forecasts and comments relating to the targets and strategies of the Societe Generale Group.

These forecasts are based on a series of assumptions, both general and specific, notably - unless specified otherwise - the application of accounting principles and methods in accordance with IFRS (International Financial Reporting Standards) as adopted in the European Union, as well as the application of existing prudential regulations.

This information was developed from scenarios based on a number of economic assumptions for a given competitive and regulatory environment. The Group may be unable:

- to anticipate all the risks, uncertainties or other factors likely to affect its business and to appraise their potential consequences;
- to evaluate precisely the extent to which the occurrence of a risk or a combination of risks could cause actual results to differ materially from those provided in this presentation.

There is a risk that these projections will not be met. Investors are advised to take into account factors of uncertainty and risk likely to impact the operations of the Group when basing their investment decisions on information provided in this document.

Unless otherwise specified, the sources for the rankings are internal.

The Group's consolidated accounts at 31 December 2011 thus prepared were approved by the Board of Directors on 15 February 2012. The consolidated financial statements are currently being audited by the Statutory Auditors.

The financial information presented for the financial year ended 31 December 2011 has been prepared in accordance with IFRS as adopted in the European Union and applicable at this date.

SUCCESSFULLY ADAPTING TO A NEW BANKING WORLD

Done in 2011

- Refocusing on our core strengths
  - **Leading global franchises: natural resources financing, equity derivatives, cross assets structured products**
  - **European client base**
  - **Euro corporate bonds and Euro rates**
- Strong deleveraging

2012

- Acceleration of the shift towards an "originate to distribute" model
- Pursuing deleveraging
  - **Selective loan origination**
  - **Shift in refinancing mix between short term and long term funding**
  - **Downscale or exit of non core activities**
- Strong action on costs
  - **Worldwide staff adjustment plan to preserve SG CIB competitiveness**

Our ambition

- New model, more integrated, resource-light and distribution-oriented
- Value creation for the Group while maintaining prudent risk management

  - **Fundamentals unchanged as the rating action was solely due to the downgrade of France’s sovereign rating (from AAA to AA+).**
  - **Solid business position featuring a diversified business profile, strong commercial position in key businesses and more focused strategy.**
  - **Adequate financial profile and liquidity**
  - **High systemic importance in France, a country that is viewed as supportive to banks**

- Moody’s LT rating downgraded by one notch to “A1” in December 2011. New review initiated in 16th February along with 113 other European banks.
  - **Good geographical diversification and business mix; Resilient retail banking franchises delivering reliable earnings**
  - **Very high likelihood of systemic support in case of need**

- Fitch’s LT rating affirmed at A+ following an extensive review ended 15th December
  - **Rating reflects SG’s franchises in retail banking and corporate and investment banking (CIB) and the concentration of its credit risks in EU countries as well as dependence on capital market activity.**
  - **Extremely high probability of state support**

The asset reclassification on October 1st 2008 entailed a change in management direction, based on a "credit risk" approach rather than a "market risk" approach. Consequently, the negative effect on the net banking income described above that the Group would have booked if the assets had continued to be valued at market value does not take into account the measures that would have been implemented with management at market value of the corresponding assets (hedges, disposals, etc.).

Including foreign currency loans

GROSS INTEREST MARGIN*

- The interest margin is an aggregate indicator based on three elements:
  - **Net interest income on loans**
  - **Structure effect, measured by the ratio of deposits to loans**
  - **Margin on resources: replacement rate of resources - remuneration rate of resources**

as a %

Interest margin (average rolling 12 months)	Q4 09	Q1 10	Q2 10	Q3 10	Q4 10	Q1 11	Q2 11	Q3 11	Q4 11
	2.24	2.35	2.44	2.44	2.45	2.47	2.44	2.45	2.42

Interest margin = Interest margin on loans + $\frac{\text{Deposits}}{\text{Loans}}$ x (Replacement rate of resources - Remuneration rate of resources)

* **The interest margin does not indicate the change in product or customer margins and is not the sole factor in determining the changes in net interest income**

EPS* (in EUR) (a)	**0.45**	**4.96**	**3.20**

* When calculating earnings per share, the "Group net income for the period" is adjusted (decreased in the case of a profit and increased in the case of a loss) by the following elements:
(i) the interest, net of tax, to be paid to holders of deeply-subordinated notes (EUR 273m in 2011), to holders of undated subordinated notes reclassified from debt to shareholders' equity (EUR 25m in 2011) and in 2011 EUR 276m capital gain on the redemption of subordinated notes net of taxes and accrued interests,
(ii) in 2009, the amount to be paid (prorata temporis) to holders of preferred shares (EUR 60m at end-December 2009).

Earnings per share is therefore calculated by dividing adjusted Group net income for the period by the average number of existing ordinary shares, excluding treasury shares and buybacks, but including the trading shares held by the Group.

(a) In accordance with IAS 33, historical data per share prior to the date of detachment of a preferential subscription right are restated by the adjustment coefficient for the transaction.

DETERMINATION OF NUMBER OF SHARES USED TO CALCULATE NAPS

Number of shares at end of period (thousands)	2009	2010	2011
Existing shares	**739,806**	**746,422**	**776,080**
Deductions			
Shares allocated to cover stock options awarded to staff and restricted shares awarded	11,976	12,283	9,003

Net Asset Value less Goodwill per Share (EUR)	**38.3**	**42.3**	**43.9**

*** The net asset value per ordinary share equals the Group shareholders' equity, excluding:**
(i) deeply subordinated notes (EUR 5.3 billion at end-December 2011), reclassified undated subordinated notes (EUR 0.9 billion at end-December 2011), (ii) the interest to be paid to holders of deeply subordinated notes and undated subordinated notes and (iii) the remuneration of preferred shares in 2009, determined under contractual terms, but reinstating the book value of the trading shares held by the Group.

The number of shares considered is the number of ordinary shares outstanding at 31 December 2011, excluding treasury shares and buybacks, but including the trading shares held by the Group.

(a) In accordance with IAS 33, historical data per share prior to the date of detachment of a preferential subscription right are restated by the adjustment coefficient for the transaction.

(1) Exposure at closing price
(2) The increase in L&R outstandings vs. 30/06/11 is mainly due to the foreign exchange effect. The fall in Trading outstandings is mainly due to the removal from the scope of CDOs that were dismantled.
(3) The change in attachment points results:
- upwards: from early redemptions at par value
- downwards: from defaults of some underlying assets

(4) 27% of the gross exposure classified as L&R and 78% of the gross exposure classified as trading relates to mezzanine underlying assets.
