THIRD QUARTER AND 9 MONTH 2008 RESULTS
Disclaimer

The following presentation contains a number of forward-looking statements relating to Societe Generale’s targets and strategy. These forecasts are based on a series of assumptions, both general and specific. As a result, there is a risk that these projections will not be met. Readers are therefore advised not to rely on these figures more than is justified as the Group’s future results are liable to be affected by a number of factors and may therefore differ from current estimates. Readers should take into account elements of uncertainty and risk when basing their investment decisions on information provided in this presentation. Neither Societe Generale nor its representatives shall have any liability whatsoever for any loss arising from any use of this presentation or its contents or otherwise arising in connection with this presentation or any other information or material discussed.

The Group’s consolidated financial statements were examined by the Board of Directors on November 2nd 2008.

The quarterly results at March 31st 2007, June 30th 2007, September 30th 2007 and December 31st 2007, presented for comparative purposes, have been adjusted to restate the accounting consequences of the fictitious transactions recorded in 2007 and 2008 relating to unauthorised, concealed market activities discovered in January 2008. This information is appended on pages 6 to 8. However, in order to provide more relevant information on the Group’s performance, the figures in this document correspond to reported historic data. The comments are also based on these reported historic data. The consolidated financial statements for the third quarter of 2008 and comparative data for the third quarter of 2007 (reported and restated) have been reviewed by the Statutory Auditors. The Basel II data in this presentation were not audited by the Statutory Auditors.

The figures provided for the nine months ended September 30th 2008 have been prepared in accordance with IFRS (International Financial Reporting Standards) adopted by the European Union. On October 15th 2008, the European Union adopted the amendments to IAS 39 “Financial Instruments: Recognition and Measurement” and IFRS 7 “Financial Instruments: Disclosures” published on October 13th 2008 by the IASB. Under these amendments, from July 1st 2008, businesses are entitled to reclassify non-derivative financial assets out of the fair value-through-profit-or-loss and available-for-sale categories, under certain conditions or rare circumstances. None of the reclassifications permitted by these amendments have been applied to the Group’s consolidated financial statements presented for the nine months ended September 30th 2008. This option will be used from October 1st 2008.

This financial information does not constitute interim financial statements as defined by IAS 34 “Interim Financial Reporting”. Societe Generale’s Management will publish complete consolidated financial statements for the financial year 2008.

Unless otherwise specified, the sources for the business rankings are internal.

Tier One Ratio appropriate to a scenario of intense credit stress in 2009
(All the data appearing in this slide correspond to stress-tests and are provided for information purposes. They should not be viewed as forecasts)

Stress assumptions applied

- 2009 Gross Operating Income of \( \approx \) EUR 7.9bn (not an income forecast but the lowest analyst consensus at October 31st 2008)
- 10% organic growth of RWAs (no external growth, volume effect and rating migration)
- Stress-tested Group cost of risk at 110 bp
  - Inclusion of assumptions specific to each core business
- 2009 Net Income of \( \approx \) EUR 1.6bn (not an income forecast)

Basel II Tier One Ratio of 9.0% and Basel II Core Tier One of 6.6% at end-2009

- Issuance in 2009 of additional Tier One-eligible deeply subordinated notes subscribed by the Government (totalling EUR 3.4bn) \(^{(1)}\)
- 2009 Tier One Ratio sensitivity: EUR +/- 500m of Gross Operating Income \( \approx +/- 5 \text{ bp of Tier One Ratio} \)
- Financial flexibility: lowering of pay-out ratio (central assumption 45%) would have a maximum impact of 40 bp of Tier One at end-2009

\(^{(1)}\) Percentage of hybrids in Tier One of around 27% (depending on pay-out ratio)

Conclusion
## Conclusion

### Solid Business Model
- Good activity level in a highly deteriorated environment
- ROE: 14%**(1)** in Q3 08 (1.7% including non-recurring items)

### Reduction of exposures at risk
- Continued disposals & pro-active management of hedges
- Conservative provisions for exposures at risk

### International Retail Banking
- Romania / Russia: economic slowdown, but activities remain profitable
- Adapting of business policy to local circumstances

### October 2008
- Chaotic changes on the markets with extreme volatility, but positive NBI for CIB thanks to prudent management of market risks

### Robust solvency
- High proforma Basel II Tier One Ratio: 9.0% at end-September 2008 (Core Tier One: 6.8%)
- Solvency level sufficient to weather potential adverse economic conditions
