FIRST QUARTER 2010 RESULTS

Disclaimer

The following presentation contains a number of forward-looking statements relating to Societe Generale's targets and strategy. These forecasts are based on a series of assumptions, both general and specific. As a result, there is a risk that these projections will not be met. Readers are therefore advised not to rely on these figures more than is justified as the Group's future results are liable to be affected by a number of factors and may therefore differ from current estimates. Readers should take into account elements of uncertainty and risk when basing their investment decisions on information provided in this presentation. Neither Societe Generale nor its representatives shall have any liability whatsoever for any loss arising from any use of this presentation or its contents or otherwise arising in connection with this presentation or any other information or material discussed.

The Group's quarterly financial statements at March 31st 2010 were examined by the Board of Directors on May 4th 2010. The statements are audited by the Statutory Auditor.

The figures provided for the first quarter of 2010 have been prepared in accordance with IFRS (International Financial Reporting Standards) adopted by the European Union and applicable at these dates. These figures do not constitute interim financial statements as defined by IAS 34, "Interim Financial Reporting". Societe Generale's Management intends to publish half-yearly income statements for the six months ending June 30th 2010.

Changes to the financial communication:

- (i) Since January 1st 2010, the capital allocated to the core businesses has amounted to 7% of the start of period Basel II risk-weighted assets (previously 6% of the average outstandings for the period) plus the additional risk-based capital consumption generated by each core business (deductions affecting the Basel II Tier 1 capital) and, where applicable, the specific requirements of insurance activities.
- (ii) Since January 1st 2010, Retail Banking activity in France has been structured around three networks: the Societe Generale Network, the Crédit du Nord Network and Boursorama (previously part of the "Private Banking, Global Investment Management and Services" division).
- (iii) The structured, index-fund and alternative management activities of SGAM Alternative Investments are attached to Lyxor Asset Management's equivalent activities and have therefore been part of Corporate and Investment Banking since January 1st 2010.

The Group has published all of the quarterly series restated for changes in structure for 2008 and 2009.

- (iv) Since January 1st 2010, the cost of risk has been calculated in basis points by comparing the commercial net allocation to provisions to the loan outstandings at the start of the period. The Group has published all of the quarterly series incorporating this new indicator for 2008 and 2009.

Unless otherwise specified, the sources for the business rankings are internal.
