The definitions below reflect the national specificities

Field Number	1. Glossary - Standard Harmonised Items	Definition
HG.1.1	OC Calculation: Actual	<u>Nominal Overcollateralisation "OC" ratio :</u> The OC ratio as established to comply with contractual and rating agencies minimum requirements is a nominal rate calculated by dividing the nominal outstanding amount of eligible assets (substitute assets and accrued interests excluded) by the nominal amount of covered bonds (after taking into account if any interest rate or currency swaps and accrued interests excluded).
HG.1.2	OC Calculation: Legal minimum	The most restricting OC rate required by the rating agencies is disclosed in this report Legal "Coverage ratio" : This ratio is calculated by dividing the total assets amount (including accrued interests, substitute assets and other assets as prepayments and net accrued incomes on derivatives) by the amount of priviledged debts accrued interests included (covered bonds, sums due on derivatives and collateral management fees). When the eligible assets are transfered into the cover pool using guaranteed loans, the amount of the guaranteed loans in the assets amount is replaced by the amount of the eligible assets pledged as collateral. Following amendments to the French covered bond legal framework for sociétés de credit foncier (SCF) and sociétés de financement de l'habitat (SFH) that came into force on 28 May 2014 (published in JO nº0123 of 28 May 2014), a cap on intragroup exposure has been set at 25% of non-privileged resources and the legal minimum collateralisation raised to 105%, from 102%, on a nominal basis.
		The legislation requires that a legal coverage ratio is calculated a posteriori on the basis of the audited accounting figures twice a year : as of December 31st and June 30th and on unaudited accounting figures as of March 31st and September 30th. These legal ratios are audited and available within a period of three months following the calculation reference date. The last audited ratio is provided as an additional information. As a consequence, the current ratio, calculated on a quarterly basis, is provisionnal / unaudited and is based on forecast amounts as of the end of each quarter, calculated in the report is published and is based on forecast amounts as of the end of each quarter,

HG.3.1	Other definitions deemed relevant	<u>Covered bond issuer ratings :</u> The rating agencies' methodologies ususally take the senior unsecured rating of a covered bond issuer's parent company as a starting point for their assessment of the credit risk of covered bonds. However, instead of refering to the parent company rating, some rating agencies may issue a "covered bond issuer rating" which is an assessment of the credit quality of a CB issuer's credit quality on an unsecured basis. Generally, a "covered bond issuer rating" is the same as the senior unsecured rating of the CB

If no "CB issuer rating" has been granted to the CB issuer, "NA" is be indicated. <u>Core Tier 1 ratio (%) :</u> Core Tier 1 is the Common Equity Tier 1 ratio - CET1 calculated for Bale 2,5 <u>Covered bond issuer :</u>
