Special Situations is a strategy that encompasses a combination of investment processes targeting equities or bonds whose valuation is altered by a special situation such as spin-offs, industry consolidations, liquidations, reorganizations, share buybacks and other extraordinary corporate transactions that generate investment opportunities.

Merger Arbitrage is a strategy that primarily consists of investing in equities involved in merger/acquisition operations and aims to take advantage of the spread between the price bid for the takeover and the price observed in the market.

Distressed Securities is a strategy that consists of investing in (or selling short) securities of companies for which the price has been, or is expected to be, affected by a distressed situation (e.g., pre- or post- bankruptcy).

Convertible Bonds and Volatility Arbitrage are strategies that aim to take advantage of volatility arbitrage opportunities by investing in various financial instruments. Convertible Bonds funds primarily invest in convertible bonds and discretionarily hedge some of the underlying risk factors (interest rate risk, credit risk, market risk) in order to gain exposure to volatility and/or credit risk at a very attractive price.

Fixed Income Arbitrage is a strategy that aims to take advantage of pricing anomalies between fixed income securities, sectors, markets and yield curves.

L/S Credit Arbitrage strategy is a directional strategy that involves buying bonds and credit and fixed income derivative instruments that are expected to appreciate and selling the ones that are expected to depreciate.

Global Macro is a strategy that aims to take advantage of expected macroeconomic trends and may invest in all types of markets and instruments.

CTAs Long Term is a strategy that aims to capture price movements in fixed income, equity, currency and commodity markets with the use of systematic trading models.

CTAs Short Term is a strategy that aims to capture short term price movements in fixed income, equity, currency and commodity market with the use of systematic trading models.

L/S Equity Variable Bias is a directional strategy that primarily involves buying equities and equity derivatives that are expected to appreciate and selling those that are expected to depreciate. The portfolio's net exposure to the market (possibly net long, net short or market neutral) will be actively managed depending on the manager's expectations.

L/S Equity Long Bias is a directional strategy that primarily involves buying equities and equity derivatives that are expected to appreciate and selling those that are expected to depreciate, while structurally maintaining a net long exposure to the equity market.

L/S Equity Short Bias is a directional strategy that primarily involves buying equities and equity derivatives that are expected to appreciate and selling those that are expected to depreciate while structurally maintaining a net short exposure to the equity market.

L/S Equity Market Neutral is a strategy that primarily involves buying equities and equity derivatives that are expected to appreciate and selling those that are expected to depreciate while generally neutralizing broad equity market risks.

L/S Equity Statistical Arbitrage is a strategy that primarily consists of investing in some equities and selling short other equities. The security selection approach is typically based on quantitative analysis of either fundamentals, prices, or a combination of the two. This strategy typically seeks to offer limited exposure to equity market risks.

Each index is reviewed and rebalanced on a monthly basis in line with investment guidelines and reflecting the evolution of assets under management and liquidity constraints. Owned by Société Générale Index, the indices are calculated and published on a daily basis by Standard and Poors on Bloomberg and Reuters.

A dedicated website www.lyxorhedgeindices.com provides monthly factsheets, valuations, performance and methodology and performance analyses.

LYXOR

Société Générale

Société Générale is one of the largest financial services groups in the euro-zone. The Group employs 151,000 people worldwide in three key businesses:

- Retail Banking & Financial Services: Société Générale serves 30 million individual customers worldwide.
- Global Investment Management & Services: Société Générale is one of the largest banks in the euro-zone in terms of assets under custody (EUR 2 731 billion, Mar. 2008) and under management (EUR 391 billion, Mar. 2008).
- Corporate & Investment Banking: Société Générale ranks among the leading banks worldwide in euro capital markets, derivatives and structured finance.

Société Générale is included in the five major socially-responsible investment indexes.

About SGI

Société Générale Index (SGI) is a new generation of indices designed to provide investors with unique investment solutions.

The indices draw notably on the strength of the bank's equity derivatives activities, in which Société Générale is world market leader. Compared with more traditional indices, SGI aims to provide both systematic strategy indices and thematic indices offering access to new asset classes:

- The **α-research** indices are **discretionary and/or quantitative indices** based on Société Générale's own research. Their objective is to outperform traditional reference indices.
- The **β-research** indices aim to **reflect high potential investment universes that are difficult to access** via traditional indices.

The SGI indices can be replicated using tracker funds such as exchange traded funds (ETFs) and through Société Générale certificates. Investments can also be made using structured products. SGI has developed partnerships with leading calculation agents. For example, the integrity and independence of several SGI valuations is maintained by daily calculation from Standard & Poor's.

Lyxor Asset Management www.lyxor.com

Created in 1998, Lyxor AM currently manages EUR 72.60 billion. A wholly-owned subsidiary of Société Générale Group, belonging to the Corporate and Investment Banking arm of the group, the asset management company specializes in three businesses:
